## WE'VE CREATED A CUTTING MARVEL.

50 A

ESA

ESAB Cutmaster 60i:

### **KILLER POWER-TO-WEIGHT RATIO.**

When it comes to power and weight, Cutmaster 60i has the balance down. At only 16.2 kg, its compact and lightweight design makes it super portable – but we didn't sacrifice power or performance to get there. So if it's too much power for a given job, just turn it down.

Increased cut capacity and cut speed – Cutmaster 60i's recommended cut capacity is 16mm with a maximum sever of 38mm and a 16mm pierce.

Superior duty cycle – Cut more, faster, longer. The machine's duty cycle of 50% at 60 A while cutting half-inch mild steel equates to a 7.6 kW power supply rating – the highest output in its class.

**Rugged roll cage** – With multiple lift points, the sturdy four-handle roll cage makes it easy to transport your Cutmaster 60i where you need to – including outdoors. The machine's IP23S protection rating proves it's hardy enough to face whatever elements come your way.

Automatic multi-voltage detection – The system senses what type of power you're hooked up to and adjusts accordingly so you don't waste any time manually tweaking your settings.

**Power factor correction (PFC)** – If you find yourself with a poor connection via generator or otherwise, PFC will stop the draw from spiking and keep power flowing smoothly.
