

LHJ 425 / 750

Welding Rectifiers

LHJ 425 and LHJ 750 are robust rectifiers welding with coated electrodes of any class. Experience the power of LHJ 750 safe and good quality gouging

□ LHJ 425 and LHJ 750 are welding rectifiers for welding and fabrication. They have good welding characteristics and a wide current range, LHJ 425 > 55-425 A and LHJ 750 > 80- 750 A, which permits welding with a large number of different types of electrode including basic, with diameters of 2.0 - 6.0 mm.

□ For mobility in the workshop the rectifier LHJ 425/750 is delivered with rubber wheels and handle for easy maneuverability. There are two lifting hooks provided on the top of the rectifiers for lifting and shifting.

□ The rectifier has an option to fix ESAB digital V/A meter for showing the welding voltage and current.

□ They are a fan cooled three phase rectifier connected to a three phase power.

□ The welding current is continuously adjustable within the range by means of a trouble free hand crank at the front panel controlling a movable leakage core.

□ The rectifier housing is made of power coated steel sheet designed for both indoor and outdoor usage under all weather conditions.
